

User Guide

Multi-Room Floor Calculator Ultimate (v1.1)

1. Installation

- In WordPress Admin, go to Plugins > Add New > Upload Plugin.
- Upload 'multi-room-floor-calculator-ultimate.zip' and activate the plugin.

2. Creating Calculators

- In Admin sidebar, click 'Calculators'.
- Add New Calculator:
 - Title: e.g. 'Standard Flooring'.
 - Set 'Cost per sq ft'.
 - Customize 'Thank You' message.
- Publish.

3. Branding Settings

- Go to 'Calculator Branding' in Admin menu.
- Upload logo (appears top-left).
- Set padding (5% default), background color (white default).
- Choose font family (Raleway default or custom) and font color.
- Save changes.

4. Embedding the Calculator

- On any page/post, insert:
`[multi_room_floor_calculator id=123]`
where 123 is your Calculator's ID (see list in Calculators).

5. Using the Calculator (Frontend)

- Each room row includes:
 - Room Label (optional).
 - Length (ft).
 - Width (ft).
- Click '+ Add Room' to add more rows.
- Click 'Calculate' to compute:
 - Total Sq Ft displayed.
 - Total Cost = Total Sq Ft × Cost per sq ft.
- After calculation, a Contact form appears:
 - Name, Email, Phone, In-Home measurement checkbox.
- Fill out and click 'Submit'.

6. Viewing Leads & Exporting CSV

- In Admin sidebar, click 'Leads' to view submissions.
- To export all leads, click Leads > Export CSV:
 - CSV columns include: ID, Calculator, Name, Email, Phone, In-Home?, Areas (sq ft per room), Room Labels, Total Cost.
